

Facet
Filtration Group®

QUALITY POLICY FACET EMEA

OUR MISSION

Make the world safer, healthier and more productive.

OUR COMMITMENT

As a part of the World's best known filtration group in our reference markets, Facet EMEA team is committed to provide customers with the best filtering solutions and services, meeting and exceeding the highest quality available standards in the industry.

OUR QUALITY PRINCIPLES & OBJECTIVES

As a tool to ensure this good performance, we have developed a strategy that lays on 4 quality principles, each of the ones contains a series of quality objectives we are strongly committed to:

Inspired People

Human capital is our most important asset. Day after day, we work thoroughly in order to guarantee people's safety, develop their talent and promote their level of engagement.

We want people proud of being part of Facet Team.

Long-term Customer Partnership

We think that providing customers with the highest quality products & services is not only delivering the order complying with Quality rules and Standards, but also meeting the due dates and fostering a two-way communication during the projects so they can feel comfortable and continue to trust in us year after year.

Cutting Edge Technologies & Forward Thinking

Innovation allows us to ride in the crest of the technologic wave. Competitive intelligence, technological surveillance and the capability to develop our innovation projects, together with the forward thinking of our engineers, enables us to continue being one of the favorite customer's choice in the market.

Sustainable Growth

Our environmental awareness, financial policies, social responsibility activities and a lean way of thinking demonstrate our responsiveness to our surroundings, driving our business in a respectful way and contributing towards a sustainable world.

To ensure the good fulfillment of our company strategies and objectives and guarantee the continuous improvement, Facet has developed and implemented a Quality Management System, containing the Quality Manual, together with all necessary procedures, instructions and documents to provide all the employees with the necessary information to perform their jobs aligned with Company Culture and to achieve the Company Mission: Making the World Safer, Healthier and More Productive.

This Quality Policy applies to all levels in the Organization. By signing it, Management acquires the compromise of revising it at least once a year to check its ongoing suitability, and in case needed, update and communicate to all personnel in the Company.
