

Facet's MPP Series Oil Water Separators utilize the most efficient oil and water separation technology available.

Now, this breakthrough in environmental clean-up technology is available in a lightweight, polypropylene housing. These polypropylene oil/water separators are flexible, cost-effective, and up to the challenge — wherever oil and water hit the floor.

From big machine shops to single-bay quick lubes, tooling companies to oil change centers, the MPP oil/water separators are the clear and simple solution in virtually any application.

Simple, streamlined inlet/outlet piping connections allow gravity driven or pumped flow operation. Adjustable water outlets make Model MPP flexible and feasible, regardless of foundation discrepancies and irregularities.

With polypropylene construction, the new MPP oil/water separators are lightweight and portable when empty, and corrosion resistant. These units can be installed inside or outside.

The unique Polypropylene Oil/Water Separator features the large surface area of Facet's patented MPak® technology for optimum coalescence of oils and hydrocarbons as well as efficient removal and storage of solids.

MPak® coalescing plates need very little maintenance. When necessary, cleaning is quick and easy with the MPak® Cleaning Wand.
